(54) WORK FLOW DESIGN SUPPORTING SYSTEM

(57)Abstract:

PROBLEM TO BE SOLVED: To provide a work flow design supporting system which can easily acquire the optimum work flow image for a work which requires design of a work flow system.

SOLUTION: A work flow design supporting system 10 is provided with a work process pattern information storing section 103 for storing parameter information which decides work process patterns for plural work process patterns and a work process pattern deciding section 102 which decides the work process pattern relevant to a work which requires design of a work flow system based on the

parameter information. The system decides the work process pattern relevant to the above-mentioned work and acquires the optimum work flow image for the work process pattern.

LEGAL STATUS

[Date of request for examination] 24.10.2005

[Date of sending the examiner's
decision of rejection]

[Kind of final disposal of
application other than the
examiner's decision of rejection or
application converted registration]

[Date of final disposal for
application]
